Review of Project AECOB SR/Latvian SSR

1. Production and Evaluation

Project AECOB, designed for operations into and within the Latvian SSR, produced eleven positive information disseminations during the sixteen months - 1 December 1956 through March 1958. These were concerned primarily with Latvia and included information on military and air installations and activities, civil defense training in Riga, Soviet Army vehicle license numbers, the distribution system for petroleum products, the revision of work norms and wages, and popular attitudes toward the Hungarian uprising and toward the Middle East situation. Also included was information on a helicopter unit stationed near Kaunas in the Lithuanian SSR and miscellaneous items on the Ukraine and Belorussia. Customers contributed ten evaluations of seven disseminations, all but one of which rated the information of value or of considerable value.

2. Rating of Production: C

3. Recommendation

Renewal is recommended.
